DIRECTOR'S MESSAGE

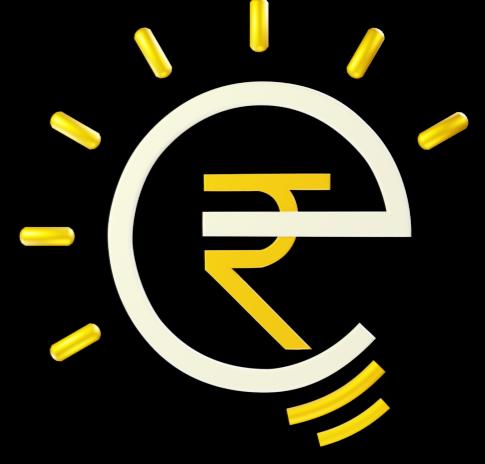

IIIT Pune was established in 2016 and since then, the institution has witnessed remarkable growth in academic excellence. With the aim of being deemed as one of the most prominent educational institutes, we render the best of resources to our students to turn them into superior scholars and responsible members of the society. IIIT Pune set a benchmark for the emerging institutes by placing its first batch (of 2020) in esteemed companies with excellent packages.

We, at IIIT Pune, are diligent in meeting the industrial needs in the most fitting ways through our student force. The institution promotes Entrepreneurship by supporting the students' calibre to curate ideas and blend them with innovation to create authentic products and offer unequivocal services. The initiative of students to set up an E-Cell while committing themselves to build a business-oriented ecosystem for the future techpreneurs is commendable. It takes a support system to achieve visible transformation. As the E-Cell committee takes it upon itself to act as the spine for the aspiring entrepreneurs, I extend my complete support to their team. The spirit of entrepreneurship must be cultivated and the institute intends to inculcate this in the upcoming opportunities we harbour.

In view of this, E-Cell at IIIT Pune comes forth with its second event - Hackathon. The young minds bear intriguing ideas to make our lives yet more convenient. We are fortunate to get this opportunity to provide them a platform to showcase their intellect and create products to implement those ideas.

We believe that cognitive thinking cannot be achieved by rote learning and academic brilliance alone. The institute takes efforts to acknowledge this pivotal factor. IIIT Pune is inclined towards offering modes of self-exploration among students in every possible aspect. In front of us lies untapped potential waiting to be explored and channelled into enterprising actions proving to be critical assets to the nation.

ABOUT E-CELL

THINK

INNOVATE

SELL

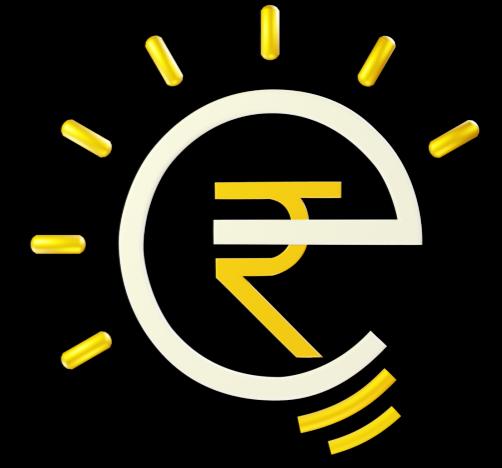

PROSPER

The Entrepreneurship Cell of IIIT Pune is a society of aspiring entrepreneurs committed towards making India the strongest economy in the world. E-Cell IIIT Pune is a non-profit organization that aims to create a business-oriented ecosystem for future techpreneurs.

We believe that 'Think', 'Innovate', 'Sell' and 'Prosper' are the four fundamental elements of a successful startup. One's ability to think of exceptional ideas and turn them into viable products with their innovative mindset forms the backbone of one's product while selling the same in the market. Eventually, prosperity chases back.

At IIIT Pune, we believe that a problem is big until the brilliant minds of the country do not ponder over it. Through this E-Cell, we desire to provide a platform to turn ideas into reality and ensure that these ideas do not go wasted due to being unnoticed or lack of resources.

HACKATHON

“

An idea that is developed and put into action is more important than an idea that exists only as an idea.

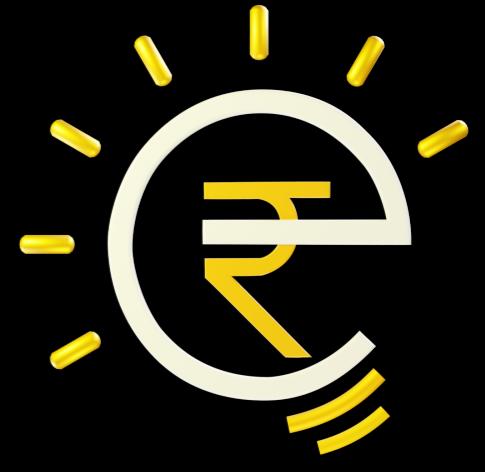

Gautam Buddha

A great idea requires a healthy environment to be turned into a reality. E-Cell at IIIT Pune comes forth with its flagship event - HACKATHON - to help the intellectuals find common grounds for execution of their innovative ideas.

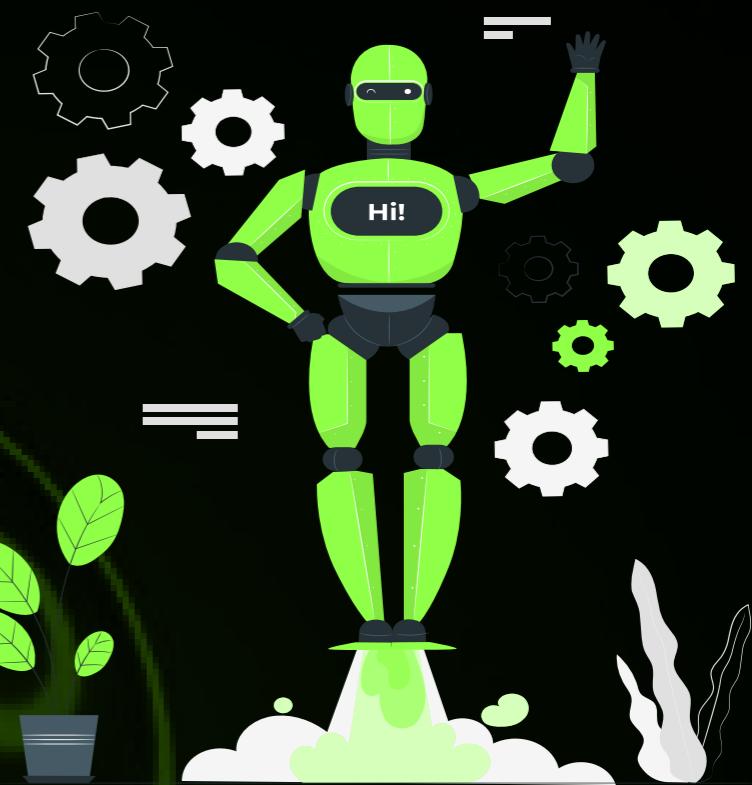

An inventive mind creates resourceful products inspired from the best. Designing software based products with accurate amounts of innovation, design and user-friendly techniques to solve the given problems is the gist of any Hackathon. We are glad to offer you an opportunity to connect with like-minded people and combine your enthusiasm levels to come up with authentic software solutions.

We want you to put your ideas into action and all the more, enhance your problem-solving skills. This event aims to help you develop an entrepreneurial skill set as you build new connections.
